All measurements are inexact. Some errors are made by the most technically advanced measurement instruments. Formally constructed, rigorously developed instruments are technically sophisticated measurement devices, and as such, are also subject to error. The test upon which this SPQ*GOLD® Sales Development Report is based is no exception. Although it represents a long tradition of research and development, it still remains vulnerable to error. Therefore, well-intentioned managers will use the results wisely . . . as training and development hypotheses, and not as hard-and-fast impersonal conclusions to be imposed upon the lives and careers of other people.
